The Infinite Dial 2009

Radio's Digital Platforms
AM/FM, Online, Satellite, HD Radio™ and Podcasting

Sponsored by TargetSpot™
Overview

• In January 2009, Arbitron and Edison Research conducted a national survey of 1,858 people aged 12+, exploring digital radio platforms:
  ➢ Online Radio
  ➢ Satellite Radio
  ➢ HD Radio
  ➢ Podcasting
• The 17th study in a series dating back to 1998
Internet Access Trends

Podcasting
Understanding Podcasting

“Audio podcasting is the concept of downloading various types of longer-form online audio programs, in the form of digital files you can listen to at any time you choose.

Audio podcasting does NOT refer to the downloading of individual MP3s or songs.

Audio podcasting does refer to the download of program-oriented online audio (such as a talk show or a hosted music program), usually as an automatic download that can be listened to at the user’s convenience.”

HD Radio
Understanding HD Radio

“HD Digital Radio is a new technology that enables AM and FM radio stations to broadcast their signals digitally, providing listeners with vastly improved audio quality.

In addition, HD Radio features new radio formats that may not be currently available on regular AM/FM radio in your area.

HD Radio also allows for a digital display with song information, weather reports and traffic alerts.”

“How much of an impact on your life has (platform/device) had?”
(“5” = “Big Impact”; “1” = “No Impact at All”)
Cell Phones and AM/FM Radio Have Greatest Total Impact

Total Impact = % Big Impact on Life x % Who Use/Own

- **Cell Phone**: 38%
- **Local AM/FM Radio**: 19%
- **iPod**: 6%
- **MP3 Player (Other Than iPod)**: 3%
- **Online Radio**: 2%
- **Satellite Radio**: 2%
- **Audio Podcasts**: 1%

Question: "How much of an impact on your life has (platform/device) had?"  
("5" = “Big Impact”; “1” = “No Impact at All”)
Implications
AM/FM Radio Has Broad Impact in the New Digital World

• 92% of Americans aged 12+ use AM/FM Radio each week
• One in five say AM/FM Radio has a big impact on their lives
• Radio’s “Total Impact” is second only to cell phones among audio devices/media
• Eight in 10 Americans say they will continue to listen to AM/FM radio as much as they do now despite increasing advancements in technology
• Online radio users spend more time with radio overall, not less
Recent Growth in Online Radio Usage Is Promising

• An estimated 42 million tune to online radio on a weekly basis, which is more than twice the number from 2005

• The key radio demographic of 35- to 54-year-olds are becoming more frequent online radio listeners
Radio’s Digital Platforms Provide Advertisers With New Touch Points to Reach Desirable Targets

• Radio’s digital platform users are a highly attractive segment

• Online radio users are well-educated, upper income, full-time employed and digitally savvy consumers

• Broadcasters are providing an increasingly wide variety of digital options for advertisers and new methods to connect ROI with media spend
Americans Are Exercising More Control Over Their Use of Media

• Americans are increasingly enhancing their use of traditional media with new ways to control how, when and where they consume information and entertainment

➢ Use of online radio, online video, podcasting, and iPod/MP3 players are on the rise

➢ Consumers say flexibility, control and variety drive their use of online and portable media options
Consumers Expect to Find Their Content Online

- Broadband access is now the norm, and weekly online audio and online video usage have reached critical mass
- Media not meeting consumer expectations will suffer as their brand-loyal users will find other options far more easily
- Pulling digital audio streams will accelerate adoption of alternative choices
Consumers Want Expanded Media Options While in Their Cars

• One-third of Americans say they are interested in online radio in their cars
• Satellite radio continues adding subscribers
• iPod/MP3 player ownership and podcast usage continues to grow while more car radios have auxiliary jacks
Audio Content Providers Should Not Ignore the Explosion of Online Video

- Radio station Web sites must embrace online video, and not just online audio
- Use of online video exceeds online radio
- Two-thirds of monthly online radio users also watched online video in the past month
Media Should Accelerate Efforts to Get Their Content On Mobile Phones

- Broad usage and impact of mobile phones suggests that they are the next frontier for media opportunities
- Content providers who have not done so already should consider finding ways to extend their content to mobile phones
Little Evidence to Date of Significant Interest or Uptake for HD Radio

• Awareness of HD Radio marketing or “buzz” has not changed substantially in the past three years and interest remains flat

• HD Radio’s value proposition still may not be clear to consumers
Social Networking Is Now Mainstream

• One in three Americans aged 12+ and two-thirds of teens and 18-24s now have a profile on a social networking site
• Social networking is a vital communication channel for consumers; content providers should find ways to tap the power of this new digital platform
